Super Pan 3®

FORM AND FUNCTION CHANGES EVERYTHING

- Pans have a unique patent-pending ramp to easily pull and lift from wells
- Beautiful frames enhance your food presentation
- Pan edges are flattened for tighter seal with well - stronger, less bending
- Reinforced corners for stronger pan-spout shape, for easy pouring
- Spoon shape coved corners help in serving and clean up
- Built-in anti-jam stacking lugs keeps pans separated to allow air to flow
- Capacities are stamped on all pans
- Because the Super Pan 3® system is flexible, all stainless steel parts are interchangeable with plastic

Super Pan II®

- Constructed of 22 gauge, 300 series stainless
- Stacking lugs prevent pans from sticking together when stored, eliminating the need to pry pans apart before use and the air space between pans eliminates vacuum seal for faster drying
- Coved interior corners are shaped to the spoon, making scooping easier while maximizing serving yield and also allowing for quick clean-up
- Capacity is stamped on the bottom of every pan as an easy reference for accurate yield and portion control
- Flat edges and corners keep pans tight in the well, sealing in heat and cold to keep temperatures even
- Covers with reinforced edge stay flat longer and fit securely to help prevent seepage or spills during transport

FULL AND HALF SIZES ALSO AVAILABLE IN HEAVY 20 GA. MULTI-PURPOSE OR PERFORATED PANS.

WHAT MAKES A GOOD KNIFE?
SHARPNESS – MOST IMPORTANT IS HOW WELL ITS BLADE WILL TAKE AND HOLD AN EDGE.
DURABILITY – A GOOD KNIFE WILL STAND UP TO GENERATIONS OF DAILY USE WITHOUT UNDUE WEAR OR DETERIORATION. ESPECIALLY IMPORTANT IS A MOISTURE-PROOF HANDLE.
HYGIENE – ALTHOUGH CUTLERY STEEL IS NATURALLY SANITARY, MATERIALS AND CONSTRUCTION DETAILS OF THE HANDLE SHOULD MINIMIZE CREVICES THAT OFFER HOSPITALITY TO BACTERIA.
